EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Smith on January 21, 2005.

The application has been amended as follows:

The first line of claim 31 has been amended from "a physical object" to "a physical object having mass and size".

Allowable Subject Matter

2. Claim 7-20, 22, 24, 25 and 31-35 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to method to transport a physical object having mass and size according to the path taken by the corresponding data packet.

The closest prior art, Jorgensen (US 6,680,922), teaches physical routers and logical routers transporting data. Jorgensen, however, fails to teach transporting a physical object having mass and size. The limitation of transporting a physical object having mass and size through the physical network from the sending station

to the receiving station over a physical path corresponding to the path taken by the data packet through the logical network is claimed in the independent claims 31-35 and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
